

Test report for the sample DMMI BIO 44/2008

The test results relate exclusively to the sample tested under the given number

Client: **Mr. Ludwig Fürst, Aquita GmbH**
Pulvermühlstrasse 23, A-4040 Linz

Sampling: **by the client**

Designation of the sample by the client: **Aquita**

Sample preparation: **homogenisation**

Plant compatibility test

(The values are averages derived from three repeats)

Comparison substrate	Testing-agent g	Germination-rate %	Germination delay in days	Biomass g	= %	Plant colour	Abnormalities
Test plant: garden cress							
100 %	--	100	0	5.1	100	Green	None
100 %	1	100	0	5.8	115	Green	None

Note.

1g of the testing agent was added to the test row during each repeat.

Content of germinable seeds and plant parts capable of sprouting

Number of germinating plants per litre of compost	--
---	----

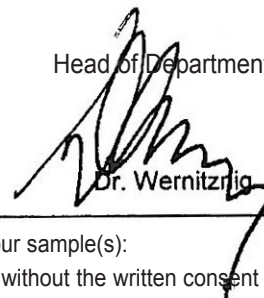

For the examination:

Dipl.-Ing. Pfundtner

Head of Department:

Dr. Wernitzrig

The following accredited testing process was used for the examination of your sample(s):
